ĐINH PHI HÙNG

Java Backend developer

Personal Summary

A Java Backend Developer with a solid background in Software Engineering and hands-on experience delivering real-world projects using Spring Boot, PostgreSQL, and cloud services such as AWS. Strong logical thinking, excellent teamwork capabilities, and a proactive approach to problem-solving. Actively involved in academic and scientific research projects. Eager to learn new technologies in alignment with company demands and industry trends.

Personal Information

Hoc Mon, Ho Chi Minh City

Technical Skills

Programming Languages:
Proficient in Java and Python. Familiar with C/C++, C#, PHP, and JavaScript.

Education

INFORMATION TECHNOLOGY – SOFTWARE ENGINEERING — **2020 - 2025**
Saigon University

GPA: 3.26/4.00

Work Experience and Personal Projects

Company Name: Sharework Corporation — **1/2025 - 4/2025**

Position: Java Full Stack Intern

Project 1:

- **Product**: *https://play.google.com/store/apps/details?id=com.ataraxiashorin.nail2*
- **Overview:** Mobile application "KITEMITE - キテミテ". A mobile application that enables customers to shop at convenience stores without staff interaction.
- **Technologies:** Java (language); Spring Boot (framework); PostgreSQL, RDS, S3, Cloudinary (databases & services).
- **Tasks Description**: Analyzed, designed, developed (coded), and maintained backend functional modules; Conducted system testing; Researched deployment strategies; Integrated third-party services such as Cloudinary, EC2, RDS, S3, Paypal, etc.

Project 2:

- **Overview:** A Website similar to Mioto (https://www.mioto.vn) designed to support car rental services.
- **Technologies:** Java (language); Spring Boot (framework); PostgreSQL, RDS, S3, Cloudinary (databases & services).
- **Tasks Description**: Analyzed, designed, developed (coded), and maintained backend functional modules; Conducted system testing; Researched deployment strategies; Integrated third-party services such as Cloudinary, EC2, RDS, S3, Paypal, etc.; Researched and developed frontend using Dart and Flutter.

PERSONAL PROJECT — **5/2025 - 7/2025**

Sales Management Backend System

- **Technologies:** Java (language); Spring Boot (framework); MySQL (database).
- **Main Features:** Provides RESTful APIs for frontend to interact with data.
- **Tasks Description:** Designed and implemented backend system; developed RESTful APIs to handle CRUD operations; conducted system testing.

PERSONAL PROJECT — **5/2025 - 7/2025**

AI Chat Box Backend System

- **Technologies:** Java (language); Spring Boot (framework); MySQL (database); Ollama 3.0 (AI model).
- **Main Features:** Provides RESTful APIs for chat-based consultation services.
- **Tasks Description:** Designed and implemented backend system; built APIs to read data from the database; integrated Ollama machine learning model for prompt handling and response retrieval.

PERSONAL PROJECT — **5/2025 - 7/2025**

Auto Click Tool with Conditional Logic

Databases:
MySQL, PostgreSQL, SQLServer, Firebase, SQLite.

Frameworks & Libraries:
Spring Boot, Jakarta EE, Android Framework, ASP.NET, TensorFlow, Keras, Flutter.

Tools:
Git, GitHub, Postman, IntelliJ IDEA, VS Code, Eclipse, PyCharm, Draw.io, Git Desktop, XAMPP.

Strengths

Proficient in Git and GitHub, familiar with professional team workflows.
Strong communication skills with proven experience in team collaboration and small-team leadership.
Good logical thinking, proactive, and effective problem-solving.
Capable of organizing tasks and preparing detailed reports.
Adequate English communication; proficient in office software (Word, Excel, PowerPoint, etc.).

Certificates

Bachelor's Degree from Saigon University — Excellent grade
TOEIC LR: 810/990
TOEIC SW: 320/400
Certificate of Outstanding Completion in Scientific Research

Career Objective

As a recent Software Engineering graduate, I am seeking a position as a Java Backend Developer to further develop my professional skills in real-world applications. My short-term goal is to gain solid hands-on experience, master backend technologies, and handle increasingly complex tasks. In the long term, I aim to become a Java Full Stack Developer to contribute across the entire software development lifecycle. I am always ready to learn new technologies as required by the company and keep up

- **Technologies:** Java (language); OpenCV, JavaFX (libraries).
- **Main Features:**

Version 1: Basic left/right clicking, speed adjustment, loop control, mouse position setup, hotkey support.

Version 2: Records and replays mouse action sequences with adjustable speed and loop count, supports hotkeys.

Version 3: Supports multiple recorded sequences with image condition matching and hotkey triggers.

- **Tasks Description:** Designed UI and implemented functionality for all three versions; packaged the application.

SCIENTIFIC RESEARCH 9/2024 - 3/2025

Topic: Dataset Development and KVQAE Problem Solving

- **Grade:** Excellent
- **Overview:** The KVQAE task addresses the challenge of answering visual-based questions in modern machine learning models.
- **Technologies:** Python (language); Data sources include TriviaQA, Wikipedia, Wikidata, Wikimedia Commons.
- **Tasks Description:** Researched algorithms for building knowledge bases (KB) and datasets; evaluated machine learning models using KB and datasets across two stages: information retrieval (IR) and reading comprehension (RC); improved algorithms and model performance; proposed further enhancements for future research.

CONFERENCE PAPER – FAIR 5/2024 - 6/2024

Topic: Distributed Data Processing System Development

- **Overview:** Improved the ACAC algorithm to support parallel execution for optimized performance.
- **Technologies:** Java (language); Apache Hadoop (framework).
- **Tasks Description:** Studied distributed architecture using Hadoop; analyzed the ACAC algorithm; built prototypes and applied Hadoop to execute the algorithm in parallel.

ACADEMIC PROJECTS 2023 - 2024

Social Network Web Application

- **Overview:** A social networking website to connect users.
- **Technologies:** Java (language); J2EE (JSP, Servlet) platform; MySQL (database).
- **Main Features:** Admin panel to manage users; user functionalities such as account registration, email verification, profile updates, posting, commenting, messaging with file attachments, and video calls.
- **Tasks Description:** Team leader; progress reporting; implemented both frontend and backend features for friends, search, filters, pagination, messaging, video calls via Stringee API; backend for admin system; QR code integration for friend connections.

ACADEMIC PROJECTS 2023 - 2024

Manga Reader Android App

- **Overview:** An Android mobile application for reading manga.
- **Technologies:** Java (language); Firebase, SQLite (databases).
- **Main Features:** Admin can manage CRUD data; users can read manga, search, apply filters, save favorites, update profile, rate and purchase manga.
- **Tasks Description:** Team leader; handled reporting; implemented both frontend and backend for payment and user management features; integrated Google login via Firebase and email

with the latest industry trends to grow and perform effectively.

verification via Gmail API.

PROGRAMMING CONTEST 2022 - 2023

Venue: Thu Dau Mot University

- **Ranking:** 18th out of 200 participants.
- **Overview:** Solved real-world problems using algorithms with a focus on optimizing execution time and handling large datasets.
- **Technologies:** C/C++, Java, Python, Pascal

ACADEMIC PROJECTS 2022 - 2024

Other Course Projects

Project 1: A desktop application for gender and emotion recognition on Windows and Linux, developed using Python, Tkinter, MySQL, machine learning models, and custom datasets.
Project 2: Development of deep learning models MobileNet and PSPNet using Python, along with datasets including fer2013, RafDB, Etis, and CVClinic.
Project 3: A 2D game application built with Unity using C#.
Project 4: A laptop e-commerce website developed with PHP and MySQL.
Project 5: A mobile phone store website developed using C# and ASP.NET.
